

END FIXED CHIMNEY SURROUND, AUCKLAND

CHIMNEY SURROUNDS

The cherry on top

There are many options available when designing louvre chimney surrounds. The actual shape or footprint of the surround is largely dictated by the chimney itself.

Determine what size louvre blade will be best suited, both aesthetically and functionally. Wind flow through the louvre blades can assist with the actual venting of the chimney. The surround's support structure can be a combination of aluminium box section, angle or channel. Please discuss with Louvretec.
